Bi-Metal Unique® Unified Shank® Jig Saw Blades

The only blades that fit both Universal and Bosch tools

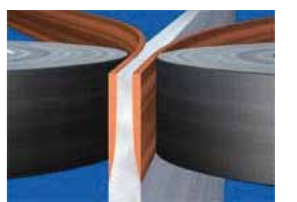

Keep it simple. Easy to say but not always easy to do. The ingenuity behind Starrett's Unified Shank® design for jig saws eliminates the need to stock and use two different blades for the exact same job. Our patented Unified Shank® jig saws are the first and only blades that fit both universal shank and Bosch shank jig saws.

Unified Shank® jig saws also incorporate the Starrett exclusive bi-metal unique® process technology. Blades made from this process resist breakage, cut faster and last longer than conventional saws. Unified Shank® jig saws are available in 5 blade packs, twenty blade packs and in various assortment packs.

Top left & right: Teeth develop a groove after initial use, altering the blade area engaged in the cut for Multi-Edge Performance. Bottom right: More weld contact area means reduced breakage

THE NEW DUAL CUT™ JIG SAW BLADE

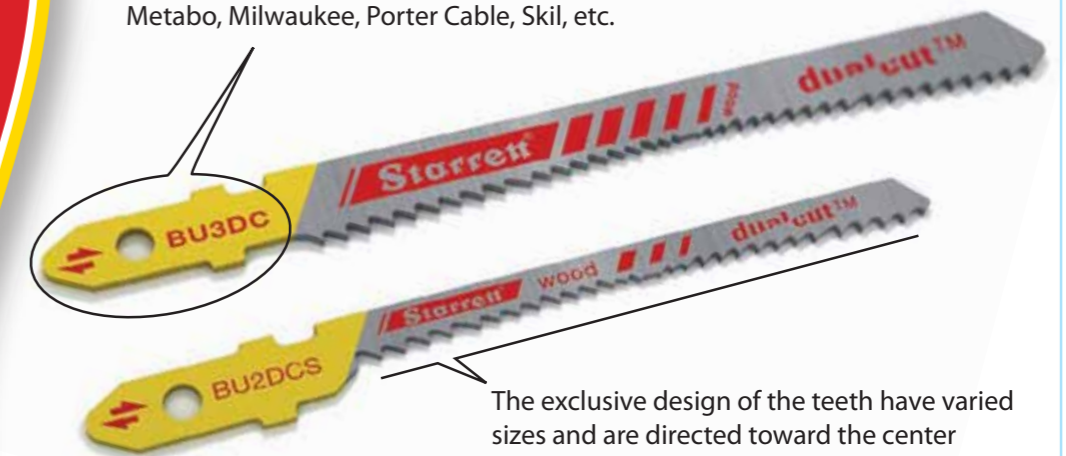

dual cut™

The technology of the perfect cut. Without the chips.

The Dual Cut from Starrett provides faster cuts that accommodate any type of finishing. Cuts without chips on both sides! Ideal for cuts of MDF, laminated and re-covered wood in general.

Exclusive Unified Shank that adapts to Black & Decker, Bosch, Craftsman, Dewalt, Hitachi, Makita 4340, Metabo, Milwaukee, Porter Cable, Skil, etc.

The exclusive design of the teeth have varied sizes and are directed toward the center of the blade, guarantees faster, more precise cuts and without the chips. Dual Cut and the technology of the perfect cut, patented worldwide by Starrett.
